## Airbag and Restraint Systems for Insurers

3 Continuing Education Credits  
Approved by Michigan Insurance Administration

The primary course objective is to give the agent and/or adjuster a more complete understanding of seatbelts and airbag restraint systems. Having this understanding enables insurance personnel to better serve policyholders and offset the risk and liability of insuring vehicles. By understanding the rules of law, safety considerations, and the basic principles of restraint system operation, safety, and repair, the insurer can more accurately inform, assist, and protect the policyholder. By giving the agent, and ultimately the consumer the proper understanding of what to look for when buying, operating, and repairing a vehicle with a restraint system, agents can better facilitate issues associated with its insurance and, if required, what type of repairs to have made while ensuring that their safety is not compromised.

DATE/TIME: **May 4, 2010 1:00 p.m.**  
PLACE: **Dewey's Auto Body**  
**1111 W Green St., Hastings**  
INSTRUCTOR: **David Solmes, President**

Course Fee \$35.00
